## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Cathy Kodroff on June 5, 2006.

The application has been amended as follows:

- 2. Specification: Page 1: below caption "CROSS-REFERENCE TO RELATED APPLICATION", replace "This is a continuation of US Patent application ..., filed August 17, 1998" with - This is a continuation of US Patent application 09/135,228, filed August 17, 1998, now US Patent number 6,649,235. -
- 3. Claim 24: Line 11, after "and wherein said coated polymeric", substitute "article" with - film -.

Application/Control Number: 10/663,934

Art Unit: 1772

. . . . .

4. The following is an examiner's statement of reasons for allowance: the closest prior art of record, US 5,882,798, fails to teach or suggest, even in view of US 4,552,714, US 4,957,968 and US 5,741,594, the combination of a coated polymeric film comprising: (a) a coextruded polypropylene substrate consisting of a first outer surface of a maleic anhydride modified polypropylene layer and a second outer surface of a polypropylene layer; and (b) a polysilicate coating on the maleic anhydride modified polypropylene layer, wherein component (a) is stretched approximately 4 to 5 times in the machine direction, followed by a transverse stretching approximately 9 to 10 times, such that a thickness of component (a) in the range of about 0.5 to about 2 mil was achieved prior to coating; and wherein said coated polymeric film has an oxygen transmission rate of 3 to 15 cc/m<sup>2</sup>/day at 1 bar, 23°C and 50 % relative humidity. None of the references teach the specific stretching of approximately 4 to 5 times in the machine direction, followed by a transverse stretching approximately 9 to 10 times for a coextruded substrate of maleic anhydride modified polypropylene layer and polypropylene layer or the specific oxygen transmission rate of 3 to 15 cc/m<sup>2</sup>/day at 1 bar, 23°C and 50 % relative humidity, of the polysilicate-coated film. Applicant demonstrates unexpected results with an oxygen transmission rate of 3 to 15 cc/m<sup>2</sup>/day at 1 bar, 23°C and 50 % relative humidity, when compared to the oxygen transmission rate of 45 cc/m<sup>2</sup>/day at 1 bar, 30°C and 45% relative humidity (1 atm, column 9, line 39), of the polysilicate-coated biaxially-oriented polypropylene film of 1.2 mil thickness disclosed by US 5,882,798 (BOPP, column 9, lines 25-30).

Application/Control Number: 10/663,934

Art Unit: 1772

5. The restriction requirement in the Office action dated 08/11/04 excluded any double-patenting over US 6,649,235, issued from the parent application 10/135,228.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Sow-Fun Hon whose telephone number is (571)272-1492. The examiner can normally be reached Monday to Friday from 10:00 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon, can be reached at (571)272-1498. The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
